

## Gentle Giant Moving Company - SBLP Certified (2019)

“Gentle Giant has been honored to participate in the Sustainable Business Leadership Program in partnership with the Sustainable Business Network of Massachusetts. Since working with the SBN, our company has been more mindful of our environmental impact and how small changes throughout the business can make a huge impact. Our business has committed to an ongoing effort of finding the best sustainable alternatives for the products and services we use on a regular basis. When we are attentive of where we source our materials and how we recycle our products, we avoid contributing excess plastic into landfills and reduce our carbon footprint.

Since our participation in the Sustainable Business Leadership Program, we have changed the supplier of our utensils and plates, instead purchasing compostable alternatives to these items at a comparable cost. The paper we use within our office has been recycled and is purchased from a new supplier. Due to our increased mindfulness, we are better at identifying which unwanted items we can donate and which can be recycled, rather than these products contributing to excess waste. Our box delivery routes are planned with greater intention to reduce gas mileage. We have stayed consistently aware of where we are buying our supplies to ensure we are making the most sustainable choice.”
